

Save Money — and Get Free — Energy Saving Supplies

HOME ENERGY 101

Sign up for Home Energy 101 to work with a home energy adviser to find the best areas for utility savings and efficiency improvements at your home, apartment or condo.

This program will also identify up to **\$300 worth of FREE energy savings supplies to lower your utility bills**, and it's one of the qualifications to apply for Home Energy Retrofit Program grants on projects like roof insulation or a home heating and cooling system.

HOW IT WORKS

With this 60-90 minute visit, you will work with a home energy adviser to walk through your home to identify specific areas for improved energy performance, including opportunities to **reduce your energy bills** and **improve home comfort**. To fully understand your home and the opportunities to improve it, together you will:

Review past utility bills to see how your home compares to others like yours in the area

Identify opportunities for free energy saving supplies, which we'll mail to you after your session including (as needed):

- Caulk
- Spray foam insulation
- Weather stripping (various lengths)
- Duct, outlet and furnace seals
- Faucet aerators & water saving shower heads
- Pipe wrap
- Window air conditioner covers
- Storm window insulation kit
- Laser infrared temperature sensor & plug-in power meter
- LED light bulbs
- Programmable thermostat

Review installation information on how to use your free energy saving supplies

View thermal images of your home that show where insulation or sealing is needed

Create an energy plan for your home

NEIGHBORS EDUCATING NEIGHBORS

To extend access to our program, we have trained home energy advisers with organizations across Holland including: Outdoor Discovery Center, Community Action Agency, Habitat for Humanity, and more!
